PROFESSIONAL SUMMARY

Results-oriented Cloud & DevOps Architect with 7+ years of expertise designing resilient multi-cloud architectures on AWS, automating deployments with Terraform and Kubernetes, and building zero-downtime CI/CD pipelines.

TECHNICAL SKILLS

Skills: AWS, Docker, Kubernetes, Terraform, Linux, CI/CD, Jenkins, GitHub Actions, Bash, Ansible, Prometheus, Grafana, Python, Helm, Nginx, Security

WORK EXPERIENCE

Lead DevOps Engineer · OmniCloud Solutions 2020 - Present

- Engineered cloud infrastructure on AWS using Terraform and CloudFormation across 3 global regions.
- Orchestrated multi-tenant Kubernetes (EKS) clusters supporting 200+ containerized microservices.
- Automated end-to-end continuous integration and deployment with GitHub Actions and Jenkins.
- Implemented real-time monitoring and alerting stacks with Prometheus, Grafana, and Datadog.

Systems & DevOps Engineer · Hyperion Networks 2017 - 2020

- Administered enterprise Linux server clusters and configured Nginx reverse proxies.
- Developed automation scripts in Bash and Python for infrastructure provisioning.
- Enforced cloud security compliance and automated vulnerability scanning.

EDUCATION

Bachelor of Science in Information Technology, Georgia Institute of Technology (2013 - 2017)

CERTIFICATIONS

Certified Kubernetes Administrator (CKA), AWS Certified Solutions Architect Professional
